

Narrative List of Changes

What's New

SR2002.2

The following items were accomplished with this release:

Production Trouble Reports (PTRs)

The following items were accomplished under 89U-2002 (NF)

Modified the ELSIG Module, Manage Electronic Signature, to display the View Other Diaries privilege. The ELSIG Report was also modified to indicate this.

The following items were accomplished under 117U-2002

Modified the Student Management module so that members with a Program Enlisted For code of YW have the destination of Camp Pendleton.

The following items were accomplished under 121U-2002

Modified Intelligent Forms Module, DD 216 Promotion and SGLV 8286, to correct the list of Unit Names in the drop-down list so that it is based on logged-in RUC.

The following items were accomplished under 123U-2002

Modified the MIPS Module, Record of Emergency Data report, to add Individual Sort and Unit Sort group boxes.

The following items were accomplished under 124U-2002

Modified the Student Management Module, Print Orders, to add a sort order option.

The following items were accomplished under 125U-2002

Modified the Student Management Module, Accessions, to delete the ASVAB Composite CL score.

The following items were accomplished under 126U-2002

Modified the Student Management Module, Accessions, so that the default value for gas mask type equals N (XM40).

The following items were accomplished under 127U-2002

Modified the Student Management Module, Accessions, so that if the component code is not equal to 11, the default value equals 00 for the regular Program Enlisted For code.

The following items were accomplished under 128U-2002

Modified the Student Management Module, Accessions, so that if the Program Enlisted For code is blank, either the Bonus or College PEF appears on the Depot Orders.

The following items were accomplished under 129U-2002

Modified the Student Management Module, Accessions, so that if the component code is not equal to 11, the default value equals 9971 for the Primary Military Occupational Specialty code.

The following items were accomplished under 130U-2002

Modified the Student Management Module, to make the MEPS Composite ASVAB scores mandatory if the record is marked Verified. If not verified, the record can be saved without the scores.

The following items were accomplished under 131U-2002

Modified the Student Management Module, Accessions, to remove the Dependent group boxes for all three dependents. The Dependent Location Begin Date was also removed.

The following items were accomplished under 132U-2002

Modified the Student Management Module, Depot, to group the Reserve data and the Recruiter information into group boxes.

The following items were accomplished under 133U-2002

Modified the online edits to allow HQMC 548xx RUCs to report TTC 916.

The following items were accomplished under 134U-2002

Modified the Unit Diary Module, Transactions, to ensure that, if edited, the correct status is displayed when the diary is opened.

The following items were accomplished under 136U-2002

Modified the ELSIG module so that the CO ELSIG is exempt from the 75-day suspension process and enabled COs and ECOs to edit CO information (excluding the Social Security Number and seed).

The following items were accomplished under 139U-2002

Modified the Common Utilities module, to add the Mass Deletion window and to modify the Delete Members window to allow for the deletion of the TFS Master file.

The following items were accomplished under 140U-2002

Modified the Unit Diary Module, so that the drop-down list box will still display the 'ALL' option if the Preparer's last name begins with the three letters ALL.

The following items were accomplished under 141U-2002

Modified the Unit Diary Module, Transactions, to sort by entry sequence when a Del/Add transaction is input.

The following items were accomplished under 142U-2002

Modified the ELSIG Module, to remove a Commanding Officer ELSIG from both the ELSIG table and the ELSIG User Privileges table when the CO ELSIG is deleted.

The following items were accomplished under 143U-2002

Modified the ELSIG Module, Assign CO, to allow a 1-character initial.

The following items were accomplished under 145U-2002

Modified the Unit Diary Module, Transaction Import, to add fields to Table 61 in support of web-based address changes.

The following items were accomplished under 153U-2002

Modified the MIPS Module, MIPS Reporting, to correct the Previous and Next VCR buttons.

The following items were accomplished under 154U-2002

Modified the Unit Diary Module, Transactions, so that the Members button no longer displays.

The following items were accomplished under 155U-2002

Modified the ELSIG Module, Manage Electronic Signature, to allow the CO ELSIG information to be modified in the same manner as all other ELSIGs.

The following items were accomplished under 156U-2002

Modified the REDs file on the test to add code to look for the first 3 numbers of the second phone number.

The following items were accomplished under 157U-2002

Modified the MIPS Module, MIPS Reports, so that on the Foreign Language report member information is not duplicated.

The following items were accomplished under 159U-2002

Modified the Diary Feedback Report Module, Filter by Functionality, to rename the Section Flag column to read Transaction Assignment within both the Part II and Part III tables on the Diary Feedback Report window, and also renamed the text above the drop-down list boxes from "Assigned to Section" to "Assign Transaction to Section".

The following items were accomplished under 178U-2002

Modified the Server Install procedures to allow the user to overwrite the number of concurrent users.

The following items were accomplished under 790-2002 (NF)

Modified the MIPS Module, View Members, to remove assigned UIC and attached UIC from the Individual Query Option.

Test Discrepancy Reports (TDRs)**The following items were accomplished under TDR 697**

Modified script so that the Tools menu of the Courier Information Tracking window in the Unit Diary module now includes the Sort and Filter options described in the Technical Analysis document for MT372U.

System Change Requests (SCRs)

(See the UD/MIPS Narrative List of Changes Supplement document for details of how each SCR impacted UD/MIPS. The Supplement is located in the UD/MIPS installation directory.)

The following items were accomplished with this release:

KC008-02: Establish A New Privatized Housing Process

This SCR added a new lookup table to support privatized housing processing that sends a member's Basic Allowance for Housing entitlement to a housing contractor by an Electronic Funds Transfer from funds being paid to the member. This change eliminates the need to manually start and stop the allotment when BAH rates change. This SCR also established two new TTCs: 185 000 Start Privatized Housing and 185 001 Stop Privatized Housing.

MT357: Marine Corps Martial Arts Program

This SCR created a new TTC with two sequences to report different levels of martial arts achievement. The first transaction 484 000 reports the initial martial art belt codes, and a new remark is created to maintain the history of each belt achieved by posting the level of belt earned with an eight-byte date of training completion. The second transaction 484 001 reports the instructor's re-certification after the three-year time frame has expired. The new remark with data elements has been added to the UDMIPS CUDDb, the MIPS View Members, the MIPS Reports Basic Training Record, Impromptu CUDDb catalog, and Training folder. The routine converts affected Instructor members who fail to re-certify to their prior belt status.

MT371U: Screen Resolution and Resizing

This SCR modified UD/MIPS to resize windows, to allow the windows to be maximized or minimized and to change proportionately when the resolution is changed.

MT377: Pers Tempo Planning Tool

This SCR created a new deployment box with four data elements that indicate the member's accumulated Pers Tempo Deployments during six-month intervals. These were added to the Entitlements_Information table, UDMIPS CUDDDB and the MIPS View Members, Service Report Page 2.

MT399: New Reserve Join Sequence for TTC 020 to Allow RUC 86974 (ROTC) to Join from the IRR.

This SCR created TTC 020 SEQ 162 which allows RUC 86974 Reserve Officers Training Corps (ROTC) to join personnel from the Individual Ready Reserve (IRR).

MT403: Changes to Marine Combat Water Survival Training

This SCR modified TTC 486 SEQ 001 the second prompt, WSQ Date, from a numeric word type to a date word type to allow only valid YYYYMM dates. It also modified the Impromptu Water Survival Descriptions from MEDICAL WAIVER TEMP PERM to MEDICAL WAIVER TEMP and WAIVERS GRANTED BY CO/G MCCDE (TE32G3) to WAIVERS GRANTED BY CG/CG TRNGCMD (C472TP).

MT406S: Total Force Administration System

In relation to the new Marine On-Line web-based application, this SCR added or modified TTC 386 SEQ 000-004. These can be used to add and remove e-mail addresses and to start and stop printing a Leave and Earnings Statement. These data items can now be found as part of the Basic Individual Record Report and on page 3 of the Basic Individual Record View. The Lk Grade Full Rank folder has been replaced with Lk Grade Full Rank 72. The Award Precedence ID code has been added to the LK Awards 70 table, and Electronic Mail LES Dt and Electronic Mail LES Flag Cd have been added to Electronic Mail R991.

MT409: Modification to TTC 910 000 MGIB-SR INCNT Code

This SCR modified TTC 910 000 the second prompt, ELIG CD to include the new codes 'AA', 'AB', and 'AC', and to enable only RUCS 88880, 54800, 88889 and 88888 to report these codes.

MT417: Mobilization Enhancements

This SCR modified TTC 099 by adding new SEQ 000 to enhance the mobilization process and changed TTC 826 000 and TTC 826 001 prompts to reflect EAS vice DPI.

MT427US: Electronic Diary Feedback Report – Pipe 3 Error

This SCR created an exception report that will record recycled Marine Corp Total Force System (MCTFS) transactions found during the loading of a cyclic EDFR into UD/MIPS, and will allow the EDFR to continue to load without receiving a Pipe 3 error. Previously, while loading an Electronic Diary Feedback Report (EDFR) containing recycled transactions, an error occurs, resulting in an unsuccessful load of the unit's EDFR. During the load, the recycled transactions are identified and written to the exception report, and the remainder of the cyclic EDFR continues to load without error. Modified the DFR menu in the Diary Feedback Report Summary window, under Reports to include the option Exception Report.

TSO194: Database User Manager

The InstallShield windows for installing and uninstalling the server have been changed to accommodate a recent upgrade in the Database User Manager (DBUM) application.
